

# PLATO® Workforce Readiness Solution

- Aligned to WorkKeys standards to help students fill gaps in knowledge or skills

Web-based for anytime, anywhere access to learning

Supports multiple learning styles of a diverse student population

Integrated management system tracks student progress and guides instruction

# Prepare your students for WorkKeys assessment.

WorkKeys assessments test your students' readiness to join the workforce by showing areas where they are missing skills. But illuminating those gaps is not enough. You need a mechanism to provide instruction that covers the breadth and depth of information covered in WorkKeys assessments. You also need to provide extra assistance to students, from using instruction that meets their diverse needs and learning styles to meeting their individual scheduling needs.

PLATO® Workforce Readiness Solutions provide instruction in the core skills your students, employees, paraprofessionals, or teachers need to pass the WorkKeys assessment. The easy-to-use content is accessible anytime and anywhere, providing easy access to address students' diverse scheduling needs.

PLATO® Instructional Solutions provide students with instruction to help fill knowledge gaps.

## Content mapped to WorkKeys assessment

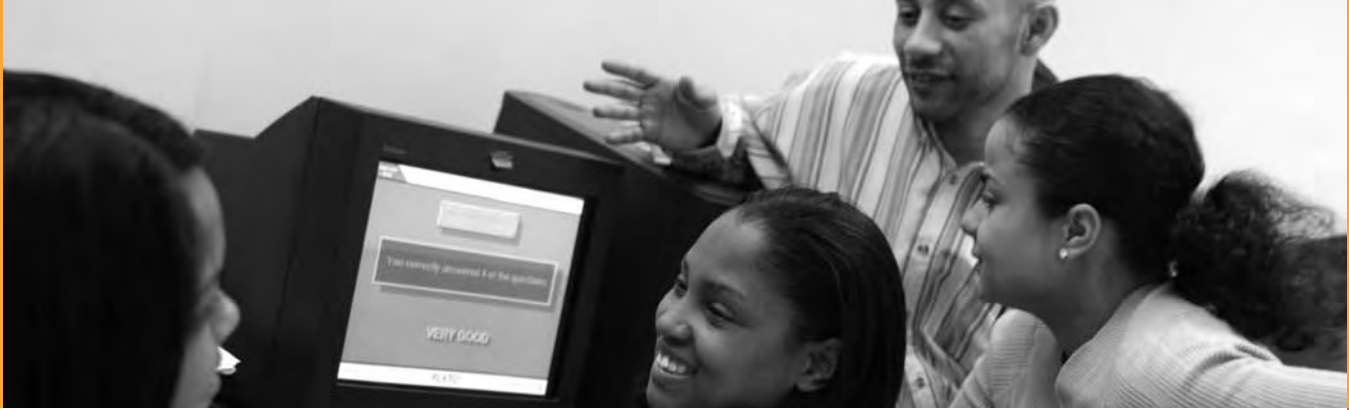

PLATO Workforce Readiness Solutions target specific skill gaps, as identified by built-in assessment, to prescribe the necessary content to help your students succeed. By focusing on the specific skill gaps, learning is more efficient and students are able to pass WorkKeys assessment and advance in their employment opportunities.

## Web-based assessment and instruction

PLATO Workforce Readiness Solutions provide cohesive delivery of assessment and instruction, so instructors can continuously measure and document students' progress. At the same time, students receive ongoing feedback and are engaged with self-paced learning. Web-based delivery serves more students at their convenience while decreasing the demand on technology resources.

## Research-based instructional pedagogy

The consistent instruction of PLATO Workforce Solutions supports the learning styles of a diverse student population. The consistent lesson structure provides a level of comfort for students and keeps the focus on the information being taught. Immediate feedback and on-screen assistance increase student motivation and success.

## Customize the aligned content you need

WorkKeys assessments test learners in nine skill areas. PLATO Workforce Readiness Solutions provide aligned instruction for eight of the nine skill areas:

- Locating Information
- Reading for Information
- Applied Math
- Writing
- Business Writing
- Teamwork
- Applied Technology
- Listening

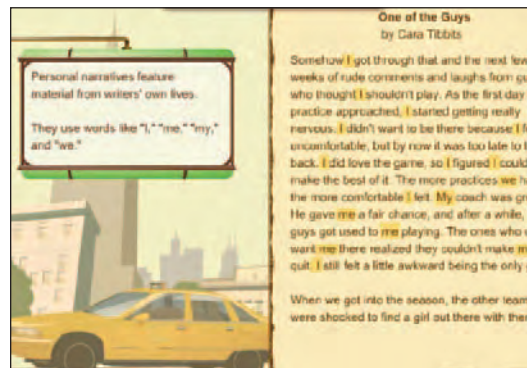

Whether your students need instruction in one WorkKeys skill area or in all eight skill areas, PLATO Workforce Readiness Solutions can be customized to meet your students' unique needs.

## Our solution can be customized to include:

- Content packages aligned to the four main assessment categories (Reading for Information, Applied Math, Locating Information, and Writing), purchased individually or together; or
- A comprehensive workforce readiness package with content aligned to all eight skill areas.

PLATO Instructional Solutions, such as PLATO® Foundational Mathematics and PLATO® Intermediate Writing Process and Practice, are aligned to information tested in the WorkKeys assessment.

PLATO Workforce Readiness Solutions includes PLATO Learning's most up-to-date products, providing your students with relevant, age-appropriate lessons.

Real learning. Real results.™
